EXPERIENCE

Sr.Manager, Software Developer	June 2021 - Present
Quinstreet, Inc.	<i>Rochester, NY</i>

- Manage all database-related tasks for CloudControlMedia, optimizing cron job runtimes and ensuring efficient data processing.
- **Reduced** sweeper processing runtime to **under 20 minutes**
- Reduced reporting tables and stats tables cronjob runtime to less than 90 minutes
- Improved reporting table efficiency by truncating older data, reducing dashboard widget load times to **2-3 seconds**
- Implemented asynchronous sweeper processing to resolve job failure issues
- Established and maintained integrations with major trading platforms including Google, **Bing, Facebook, LinkedIn, TikTok, and Centro**
- Integrated platforms into the CloudControlMedia Platform (CCMP) to fetch **campaign and reporting metrics**, significantly contributing to revenue generation.
- Developed new backend APIs tailored to client requirements, enhancing the functionality of the CCMP interface
- Built tools such as the **Forecast Tool, Media Partner Billable Report, and Revenue Calculator** for account managers and media partners
- Set up and managed the JIRA board, gathered requirements, and established development logic to streamline project workflows
- Created comprehensive technical documentation detailing the entire data workflow into CCMP for fellow developers, serving as a valuable resource

Lead Web Developer	Dec 2020 - May 2021
Rochester Institute of Technology	<i>Rochester, NY</i>

- Developed an interactive website designed to be utilized as a therapy tool within substance use treatment
- The website serves content to participants in an IPA treatment program and their partners
- It is an advanced **Wordpress 5.7** website with **Php 7.0** as a backend language and the database is designed using **MySQL**

Full Stack Developer	Feb 2020 - Dec 2020
Rochester Regional Health	<i>Rochester, NY</i>

- Created and coded initial user experience design which helped in transforming medical data into meaningful, and actionable information
- Developed Emerging Technology business evaluation application for users to share their ideas contributing to healthcare with help of technology and Admin Side for the Sr.Director to review those ideas with scoring parameters
- Designed **database schema**, conceptualised **database architecture**, and maintained **technical documentation** for all the web applications
- Developed a **Serverless API** with **DynamoDB, AWS Lambda, API IAM**, and **API Gateway** for all the projects which improved **performance and scalability by 80%**

- Managed the **Code Repository** by maintaining code in **GIT**, helped improving practices of **branching** and **code merge** to custom needs of the development team

Jr.Php Developer

Aug 2017 - Feb 2018

Network18 Media Pvt. Ltd

Mumbai, India

- Worked on www.topperlearning.com and www.caprep18.com and revamped them into a customised framework which improved **efficiency by 60%**
- Created HTML email templates for email marketing campaigns and handled customer issues for both websites from the backend

PROJECTS

Prediction of Fake Jobs - Developed a full-stack project using Machine learning and React.js which helps in classification of jobs posted online helping applicants falling prey to any scam/frauds.

Devconnector - Developed a full-stack project using MERN which allows developers to create a profile, share posts, and get help from developers around the world.

!Readdit - A smart information retrieval system that uses graph data structure to visualize news. We do not construct the article, we show the occurrences of events and thereby let the users see how each element is interconnected.

The Paper Repository - Developed a system consisting of data layers performing CRUD operations for an academic conference to accept submissions by authors.

Gun violence in USA - Developed an application using Javascript, Leaflet.js, Python Flask and MongoDB where you can visualize incidents on an interactive map.
